

BLENDING MENTAL EQUIVALENTS *with* FREEDOM OF EXPRESSION

We all know the givers of the Universe are the receivers; this is the basis for conscious or mental equivalents. Because we are living in a changing environment, we must evolve. We can call this GOOD, knowing that our growth is also good and evolving into the future and the needs of the future is important to recognize.

The only thing that stays the same is GOD. God is the CHANGELESS and we can rely on God. Trusting God not to change is a 'no-brainer'. God has always facilitated open channels for the **Law of Mental Equivalents**.

Current data tells us that the individual in today's workplace will change careers (not jobs,

but careers) an average of SIX times over their lifetime. Consequently, your new loyalty must be to your number-one asset... your own capabilities. Your business results, and your business, will grow in direct proportion to how much you grow.

Winston Churchill said, "The price of greatness is responsibility." With greater and greater results comes greater and greater responsibility. Consequently, your number-one responsibility is to grow to meet the ever-increasing challenges that you face.

EXERCISE: Recognize the voids in the market. What needs are currently not being met? See yourself meeting the needs of the Universe. Make a journal of your observations, thoughts, and progress. DON'T QUIT!

Go with the flow! - Flow with the changes!
