

Your INTUITIVE CONSCIOUSNESS of Wealth

Until you perfect your intuitive abilities, you may make some "mistakes." You will recognize the "still, small voice" when you hear it, and you will develop the courage to trust and follow it every time.

When you act in complete faith and confidence while listening to your internal wisdom, everything will unfold according to divine order... exactly when and as it should, never too early or too late. Whatever assistance, resources or relationships you may need will come to you exactly when they are needed.

Whatever wisdom or knowledge you need is also seeking you. Even if you don't know which way to turn next, you will be handed the book you need, meet the person you need to meet or manifest the money necessary to accomplish your dreams... always in the perfect time.

Get emotionally involved in your vision. HOW WILL YOU FEEL WHEN YOUR MISSION IS ACCOMPLISHED? Focus on that feeling and visualize this success for 1-2 minutes every day. Get passionate about it. Remember, the human spirit will not invest in mediocrity. At the physical level, your vision has no choice but to begin manifesting.

EXERCISE:

If you have not set aside time daily to meditate, now is the time to start. Just sit quietly and don't become judgmental about your undeveloped meditation skills or difficulty staying open to spirit. Shut off outside distractions, such as TV's and cell phones. Close your eyes and mouth and count your breaths. If you can do this for 15-20 minutes,

count yourself successful! (If your focus moves away from your breath, just go back to counting.)

After 21 days, you will have formed a habit, and you are also very likely to find, you ARE doing it right! Your mind will now have a chance to get those messages from deep inside;
CONGRATULATIONS!
